

Earth Wall Products is a supplier of retaining wall systems and construction materials used in residential, commercial, industrial, DOT and rail applications. Earth Wall Products is seeking a Geotechnical Engineer to be a part of a rapidly growing company changing the industry with innovative products.

We have an opening for a Geotechnical Engineer at our location in Smyrna, GA.

REQUIREMENTS

- Ability to identify and solve complex problems.
- Excellent verbal and written communication skills.
- Ability to be both creative and analytical.
- Extremely detail-oriented and accurate.

PREFERRED QUALIFICATIONS

- B.S. in Civil Engineering or other related technical fields from an ABET-accredited college/university with a focus in Geotechnical Engineering is required. M.S. in Civil/Geotechnical Engineering degree is preferred.
- A minimum of 2 years of experience is desired.
- EIT is preferred.
- Under direction of senior engineering staff, perform slope stability, seepage, and/or settlement analyses in support of bridges and retaining walls.
- Demonstrate verbal communication, writing, and technical presentation skills
- Demonstrate organizational skills for keeping multiple tasks on track from concept through delivery.
- Computer proficient (including AutoCAD Civil 3D, Microsoft Office Suite, and Adobe Pro). Knowledge and experience with AutoCAD Civil 3D, slope stability and seepage analyses, and foundation design software is preferred.

RESPONSIBILITIES

- Familiarity with design software, such as Autodesk, AutoCAD, Civil 3D, and MicroStation.
- Plans projects based on the analysis of relevant materials such as drawings, blueprints, aerial photography, survey reports, maps, and other geologic and topographical data.
- Developing detailed designs and quantities.
- Preparing and implementing project plans.
- Making recommendations or presenting alternative solutions to problems.
- Confidently liaising with clients and other professional subcontractors.
- Contributes to team effort by accomplishing related results as needed.

COMPENSATION

- Upon finding the optimum candidate for this role, the Geotechnical Engineer will be compensated with an appropriate and agreed upon salary compensation. The salary will match the skill of the individual.
- Benefits include: medical, dental, and vision insurance and matched 401k.
- Beyond present compensation, EWP's growth continually allows for promotion and compensation improvement.
