

Civil Engineering Intern Job Description

Earth Wall Products is a supplier of retaining wall systems and construction materials used in residential, commercial, industrial, DOT and rail applications. Earth Wall Products is seeking Civil Engineering Interns to be a part of a rapidly growing company changing the infrastructure industry with innovative products. We have an opening for a Civil Engineering Intern where we are located in Smyrna, GA.

Required Qualities:

- Creative, innovative, and outside-the-box thinker
- Diligent and over-achieving worker
- Forthright and encouraging team player

Minimum Qualifications:

- Working towards B.S. in Civil Engineering.
- Computer proficient (including AutoCAD, Microsoft Office Suite, Bluebeam and Adobe Pro) preferable.
- Self-starter with the tenacity to seek out resources to further knowledge and experience.
- Highly motivated and problem-solving attitude.
- Have a sense of urgency in responding to clients.
- Demonstrate verbal communication, writing, and technical presentation skills.

Responsibilities:

- Produce preliminary takeoffs, calculations, and quantities for designated projects under the supervision of the senior engineer.
- Produce preliminary shop drawings for retaining wall designs.
