

Civil Engineering Intern (Summer 2022) Job Description

Earth Wall Products is a supplier of retaining wall systems and construction materials used in residential, commercial, industrial, DOT and rail applications. Earth Wall Products is seeking engineers to be a part of a rapidly growing company changing the industry with innovative products. We have an opening for a Civil Engineering Intern where we are located in Smyrna, GA.

Required Qualities:

- Creative, innovative, and outside-the-box thinker
- Diligent and over-achieving worker
- Solution-oriented self-starter
- Forthright and encouraging team player
- Perfectionist with a conviction for high standards

Minimum Qualifications

- Willingness and eagerness to learn
- Self-starter with the tenacity to seek out resources to further knowledge and experience
- The ability to work independently and within a team environment
- Ability to demonstrate effective communication with all levels, both internal and external
- Highly motivated and problem-solving attitude
- Have a sense of urgency in responding to constituents
- High school diploma or GED required
- Must be enrolled in community college courses, a college degree program or other formal continuing education program
- Working towards B.S. in Civil Engineering Bachelor's Degree in Geotechnical, Civil Engineering or a related field of study
- Demonstrate verbal communication, writing, and technical presentation skills
- Computer proficient (including AutoCAD Civil 3D, Microsoft Office suite, and Adobe Pro).

Responsibilities:

- Introduction to designing and developing traffic studies, water, storm and sanitary sewer studies, and construction plans, civil engineering site plans, and roadway plans for construction
- Assist Team Leader with all aspects of project scope to include site grading, erosion and sediment control design, CAD design and drafting, storm water management design, water treatment, traffic analysis and/or utility design
- Assist with field inspections
- Be involved with the construction administration (RFI/Submittal) responsibilities
- Be results oriented, with a strong work ethic and commitment to perfection
- Promote the reputation of the company through the quality of the work
