

Senior Geotechnical Engineer Job Description

Earth Wall Products is a supplier of retaining wall systems and construction materials used in residential, commercial, industrial, DOT and rail applications. Earth Wall Products is seeking engineers to be a part of a rapidly growing company changing the industry with innovative products. We have an opening for a Geotechnical Engineer where we are located in Smyrna, GA.

Minimum Qualifications

- M.S. in Civil/Geotechnical Engineering with two years experience required, foreign equivalent accepted.

Responsibilities:

- Produce takeoffs and preliminary quantities for designated projects
- Produce final designs, calculations, and quantities for projects as well
- Improve the preliminary and final design processes - Oversee and teach younger engineers design processes
- Manage design projects and assign tasks to staff engineers
- Upkeep and improvement of existing and future Retaining Wall System Drawings including installation and production manuals
- Assist with DOT response to comments concerning product and project approvals
- Prepare CAD sketches for proposed wall solutions to assist Sales Engineers - Assist the sales team in determining optimal solutions for challenging projects
- Must be willing to travel and relocate
- You will report directly to manager. Your daily interactions will primarily be with our Sales Engineers. Also, you will be answering questions, addressing comments, and explaining our retaining wall solutions to DOT / Rail personnel, contractors, and Civil Engineering consultants

To apply, please send your resume to Jennifer Calvert (jcalvert@earthwallproducts.com) with subject line: Senior Geotechnical Engineer Resume or 1741 Dixie Ave SE, Smyrna, GA 30080.
